Note: At the end of some articles the indications *AMR, MR, ZM* and *Scopus* inside brackets denote the citation of this article (simple citation, abstract or review) in the related databases, i.e.

- *AMR* for the journal *Applied Mechanics Reviews* of the American Society of Mechanical Engineers (ASME). (Unfortunately, this journal ceased citing the publications in Applied Mechanics since 2004. Moreover, the related database is not available to the writer in its complete form even when it existed. Therefore, the related indication *AMR* at the end of some of the articles below concerns only a very small number of the articles below cited in the journal *Applied Mechanics Reviews*.)

- *MR* for the journal *Mathematical Reviews* or better for the electronic database *MathSciNet* of the American Mathematical Society (AMS).

- *ZM* for the journal *Zentralblatt für Mathematik* or better for the electronic database *Zentralblatt MATH – ZBMATH* of the European Mathematical Society, FIZ Karlsruhe (Leibniz Institute for Information Infrastructure) and Heidelberger Akademie der Wissenschaften (Heidelberg Academy of Sciences), which is published by the publishing house Springer.
